SOURCE  
SUMMIT  
2015

# PVC RECYCLING AND MARKETS

Join an interactive forum to form alliances  
and plans for PVC recovery and recycling

- At this summit we will explore opportunities to access and source PVC for cost-effective input into new products
- We will identify new products and markets, our challenges and form strategies for the future
- We will combine expertise and networks to accelerate recovery and recycling in Australia.

## Key facts

*85% of PVC is used in durable applications,  
particularly building products*

*There is an estimated 67,000 tonnes per annum  
of PVC waste to recycle in Australia*

*Currently about 10–15% of this waste  
is diverted from landfill for recycling*

*As a polymer PVC offers outstanding versatility,  
for use in a wide range of products.*
